Subject: Request Review- Stibnite Mine Site Wide Water Chemistry (SWWC) Proposed Action Model

Hi, we received the SWWC model for the proposed action this week.

Attached is a list of the docs below. Note: They always include a word version so that you can put your comments directly in. You feel free to send comments in an email or your own doc if that's easier.

Please provide your comments by **Friday, August 24th** so that I can compile and send to them by the due date (following Mr. Moore from R9 graciously agreed to help on this review since he works a lot on mining and has experience with modeling of this mine). We will have us to all talk about approach to make the best use of your time next week and then a second call to check in on the review a

File Name	Description
<i>Stibnite_Proposed_Action_SWWC_Modeling_Report_200900_07_RW_20180730.pdf</i>	PDF version of deliverable including final comments
Appendix C: 20180730_BC_Draft SWWC_SAFs_TM.docx	Word version of draft deliverable
Stibnite_Proposed_Action_SWWC_Modeling_Report_200900_07_RW_20180730.doc	Word version of draft deliverable

Thanks!!
